

DESCRIPTION

The MaxWhite® 2 is a 1.1 gain matte white front projection material that has been crafted to achieve precise white levels for full color temperature neutrality. This enhances color saturation and contrast to achieve the required points for accurate color reproduction. The ISF Certified material is a testament to its ability to meet industry standards for image fidelity in a dark room environment. The material's wide viewing angle enables viewers to take in a clear bright picture with uniform brightness from on or off axis seating arrangements.

Shown here on ezCinema 2 Series

FEATURED SERIES: ezCinema 2, ezCinema Tab-Tension, and Yard Master Sport
